

## Small O, Strong Power Ever

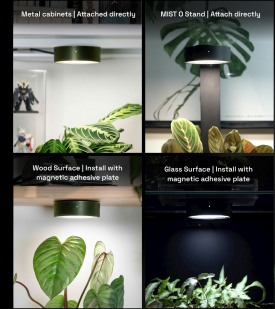

Inheriting ONF's many years of experience from aquatic plants to amphibian plants, the most complete functions are condensed into 88X27mm mini space. MIST O has built-in magnets, advanced the space usage and activated the greener space.

## Flexible Installation And Applications

MIST O, with the magnet on the top side, can be attached to any cabinets, shelving, display cabinets by using an adhesive disc prepared by ONF.

\*The provided metal sheet by ONF is using 3M® adhesive 9450A which is recommended to use on a smooth surface. If it is a slightly rough brick surface or a particular wood grain, it is recommended to purchase a suitable adhesive additionally.

## Effectively Meet The Needs of Plants

Do you know that providing light source to plants isn't enough? Different plants need different levels of light to achieve optimal growth. The four-level dimming functions can be adjusted according to the size, type, growth condition of the plants. In addition, the gradual brightness adjustment provides more comfort to your eyes.

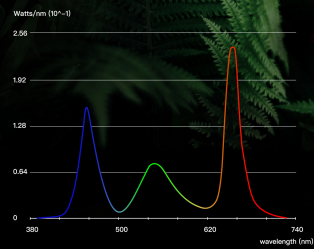

## Built - In Memory, More Energy Saving!

The built-in memory function of the MIST O can display your current setting after resuming. It also can connect to an extra timer, control the light source accurately and save more energy.

## Superior to The Sun ColorFull LED

Compared with sunlight, ONF not only captures the most beneficial wavelengths for plants, but also excels in color rendering technology to develop ColorFull LED, which can stimulate plants' growth and allow viewer enjoying more vibrant color.
